

# Djibouti International Society of Hydrocarbons

## Business concept

- Established in February 2000, the international oil company in Djibouti (SIHD) has the status of a public industrial and commercial nature.
- The importation and marketing of petroleum products and the hydrocarbon sector development are the main objectives of the company.

“ Its first mission is to ensure the import of oil and derivatives in the best

pricing conditions in Djibouti. ”

## General context

- Djibouti, with a population of 875,000 inhabitants and an area of only 23,000 square kilometers, is located at a strategic point, connecting the Red Sea to the Gulf of Aden.
- Located at the mouth of the Strait of Bab el Mandeb, the crossroads of major trade routes of the world, Djibouti's economic hub and energy increasingly vital
  - a channel through which spend each year 10% of global oil exports and 20% of commercial exports.

# opportunities

- The country is a prerequisite for the supply of hydrocarbons Ethiopian. The railway line and the land route between the two countries facilitate trade.
- Due to its geo-strategic position in the heart of a regional market of over 350 million views and major strategic projects with the prospect of building a pipeline to bring gas from Ethiopia, as well as the construction of a refinery and an oil port of last generation.

# Goals

The Djibouti Hydrocarbons International Company has set the following objectives:

- Ensuring the import of oil and oil products in the best prices;
- Ensure the fuel material security of the Republic of Djibouti;
- Ensure storage of refined petroleum products via its own storage depot;
- Take stakes in crude oil processing industries into finished products;
- Regularly monitor and analyze developments in world prices of oil products and the impact on the national economy.

Djibouti's ambitions are not limited to existing ports, but the development of a petro-chemical industrial complex in Damerjog is one of the cornerstones of an ambitious national development project: to make Djibouti a commercial and logistics hub first plane between Asia, Africa and the world.

Total industrial area is about 30.96 square kilometers, with an area of 9.9 square kilometers, the area of the sea is 21.06 square kilometers. The industrial sites such as the desalination plant, petroleum refining, construction materials, yard, storage and logistics are planned. Among the projects:

- Power plants and desalination plant cover a 29ha area;
- An oil storage project 500 000 m<sup>3</sup> covers a 40ha area;
- 2.5 million tons / year oil refinery project area of 90 hectares, and another 84 hectares of land reserved for the project.

More recently, an agreement with the overall impact was concluded on February 17 in the field of energy between Ethiopia and Djibouti. It provides for the commissioning of a pipeline from the gas fields in the Ogaden Basin in Ethiopia and Djibouti coast. Then, in a second step, the construction and operation of a natural gas liquefaction plant and a gas terminal in the Damerjog area, all with a total private financing of around 4 billion GCL-POLY American Petroleum Group Holdings Limited (China), the sponsor of this mega project.

Djibouti's development project is clearly on. Major investments, amounts committed, testify to the confidence of international partners in the long-term vision for Djibouti.

The SIHD  
thank you for
